"Best possible environment for little ones. Both my kids have been here for 2 years now. Excellent curriculum. Great teachers and loving staff. Montessori method is well known to encourage reasoning and practical learning, and this is very evident in the way kids grow in AMS. But more than the great academic advantage that AMS sets up for kids, I am a big fan of the care given to them. Every morning I feel confident that my kids are safe, they are learning good manners and are developing foundation to be good human beings in the future. That is the biggest blessing for me. How I wish they had elementary school also at this location! That would have been perfect."

Thank you AMS,  
A very happy and satisfied mom of two.

"We are so impressed with this school! Our son joined the toddler class in January and within weeks we saw so many positive changes in him. Every day he surprises us with new words and new skills. I love the Montessori philosophy and how it really empowers kids to explore what interests them and how excited they get about learning. He loves his friends and his teachers who he talks about at home. Mrs. Castanos is incredibly warm and wonderful and you can tell she really loves what she does. She is an incredible teacher. The rest of the team is also so kind, knowledgeable and helpful and they always make me feel like I can ask anything and they share details about his day. We're looking forward to the daily swim lessons in the summer too! We're grateful every day for this experience for our son."

"Satisfied with their curriculum and the teaching staff. The staff is great. Really pay attention personally to every student. I am blown away at how much my daughter has progressed since attending Apple school.

She is independent and a problem solver using her critical thinking skills which Apple has nurtured. They have really good activities and my daughter loves her school. I love the fact how on a daily basis a detailed report is sent with pictures and videos of what my daughter did in school. The parents/teachers conferences are very helpful and the teacher provides every detailed information about my daughter's performance in all the areas and areas which need improvement. I would surely recommend this school and looking forward for my son's tenure here as he will be joining the school soon."

"I love their methods and the overall approach to early education but I think they have some difficulty with the implementation of these methods. I do believe that the kids need to be pushed more out of their comfort zone especially when they could be doing more challenging

work. Teachers are patient with the kids and reach out to parents for full collaboration on various issues."

"My daughter started here in January. We cannot be more pleased with how much she has learned. We moved from another facility because she was not gaining the knowledge over there and she is here. The Teachers and Assistants are so helpful. I love the picture emails, great way to show how my child just loves learning at Apple Montessori School! The extended daycare hours is wonderful, this is one other reason we had switched to Apple, not just for Academics but for convenience in our life. We are so proud of our daughter and cannot get over how much she has learned in less than half of a year. I have recommended this school to my employees, relatives and friends. There is no better education for my child than "Apple"."

"I have sent both my children to this school and I have been extremely happy with the school. My older one was graded at a second grade level in Math when he completed Kindergarten here. He always had a lot of friends and was happy to go to school everyday. They have more field trips than any other school in the area. During the international day celebration, Kindergarteners compete for the program which is a good way for the kids to lose stage fear and also improve public speaking. My younger son has good manners and always uses "Please", Thank you and Sorry even at home with us. My parents, brother and sister are very surprised by his good manners at this young age. My younger one also loves the school. I found the teachers to be caring to the kids and friendly to the parents. I have no complaints about this school. I have recommended this school to many of my friends."

"One of the best schools in the neighborhood!! All the essentials are met...1) Education is great. My kids are reading, writing, doing maths, pursuing arts and crafts and learning music at the school...2) Social activities are given importance. The teachers encourage good social behavior, good manners and polite interaction. ..and 3) Affection and caring are part of the culture. My kids love their teachers and speak very fondly of them. They look forward to going to school and love it when they are there. I am very pleased with the school, the faculty and the facility."

"I was really happy that I made the right decision of sending my son to this school during the summer of 2012. He started during the summer camp, and there were really lots of fun activities! After school he always talked about what he did at school & I was impressed by his excitement. When I knew he was happy & got exposure to different fun staff, I felt so happy! When the school year started in Sep 2012, I noticed his improvement in reading, handwriting, math skills within about 1 month! By now he is still in pre-K, but he is capable of reading grade-1 books & he loves to read so much! Additional to the academic skills, I think he has also become more confident and easier to make new friends! Every day when I pick him up from school, he has big smile on his face & can't stop talking about his fun day in the car, I feel so lucky that he has been taken good care of in this school."

"My son went to this school and my husband i were truly amazed. He became confident, organized, and loves to learn! He graduated Kindergarten and could read on a 3rd grade level. He was also introduced to math, geography, and science. We have an older son that cannot believe his younger brother took spelling tests, knew all about the continents, and actually understood what he was reading and loved to do homework. All schools should teach this way."
