"I walk out of AMS every day being more impressed than I was the day before. The staff is attentive, professional and always positive. The facility is immaculate, secure, and extremely well organized. I feel fortunate to be a part of the AMS Family and know that my child's academic success is being built by a solid foundation."

~Alison F

"Terrific school. Our child attends K. She is at least 1-2 years ahead of public school program without even trying or being pushed to do so. Reading taught phonetically not by remembering those ugly sight words! School provides opportunities for being enrolled into extracurricular activities. Am and pm care provided if needed. Food can be brought from home or ordered monthly through service with really nice food options. Outside territory is wooded and protected from nearby local road. Also have amazing outdoor facilities for kids to play during recess which is usually twice per day in pretty much any weather. Overall, we are very pleased with the school and will be attending the school in 1st grade."

~Vera N

"We've had our little guy at the Nevins location for about a year now, and the overall experience has been positive. While the camera quality is certainly subpar, the facility itself is well maintained.

Our son is a very active 2 yr old, he gets himself into some sort of trouble at home almost every day. However, at Montessori, they must be performing some sort of magic, because he rarely comes home with a bump or bruise (rare for any daycare).

Additionally, Montessori arranges many activities for the kids to enjoy, which is always a nice break from the monotony that active kids dislike.

Keep up the good work folks!"

"My daughter has grown so much since beginning her journey here several months ago. When she first started, she was barely speaking, but now she is soaring with words! She has become very independent and does things I could never imagine a young toddler doing. I am so proud of her and so thrilled my husband and I chose this school!"

"Apple Montessori Schools are the best! They engage the child to learn and give them the desire to want to learn more and become independent children. They exceed expectations in all areas. My son has formed wonderful friendships that will hopefully last a lifetime!"

~A parent

"Both of my children have attended Apple Montessori since they were babies. We are very pleased with the education they are receiving and they LOVE school. They have formed wonderful friendships that will last a lifetime. They are also well mannered and empathetic towards others. The staff and teachers are very professional and loving. It is a wonderful place to grow-up."

~ A parent

"We are very fortunate for having found this school for our daughter who is 2 yrs and 3 months old now. She started with Apple Montessori last summer and has found a wonderful family away from home. Teachers, teachers assistants and after-school care providers are all very loving and keenly attentive to the intellectual, social and physical needs to the kids. The timings are also very friendly where both the parents are working professionals. I have been a believer in early childhood education and have been trying to educate and keep up the curiosity of our daughter at home. I was interested in a school which had similar believes and curriculum and Apple Montessori has been the answer to all our prayers. A big thanks to the management and all the staff! Keep up your passion to fill the young minds with knowledge and their hearts with love!!"

~ A parent

"Apple Montessori Schools are the best. Their teachers are the nicest most well prepared professionals I have ever dealt with. Everyone really cares about the children. Go and tour and visit the school for yourself it is so awesome. I have never seen children working so happily and independently while learning. It is really refreshing to see that these schools are maintaining a high standard. I think their reading program and enrichment programs are so amazing. My son has attended this school since he was 2 years old and he is so well adjusted , happy and most importantly he truly loves learning. He is about to graduate this week and I feel so grateful to the Bailey family for how much he has progressed in the past 4 years!"

"There are three things I looked for in a school: Safety, Curriculum, Diversity. I can absolutley say that this school has exceeded my expectations in all three areas. Being a mom that works full-time, it's critical for me to know that my children's time spent at school is helping them prepare for a very competitive college experience and then the work force. Let me give you some examples of how this school goes above and beyond. I was traveling out of town and missed the parent teacher conference. My husband attended. Yet the teacher still phoned me to give me an update. My children take a 2nd language. They are both in the music program. Spelling tests begin in K. My children's classmates actually reflect the world in which we live. The school also just implemented a world class security system. I can't say enough about this school, it's very capable teachers and the environment for success they are creating for my children!"

~ A parent

"This is school is awesome!!! I cannot say how happy I am that my 2 children attend Apple. I made the mistake of taking my 4 year out of Apple and going to a Catholic school. After 1 year I ran back to Apple in tears seeking guidance after the terrible experience my children endured in the Catholic School. Within 2 weeks I started to see the sparkle in my son s eyes return. I wish Apple went through 12th grade. My children are receiving an excellent education in a safe environment. Academically, Apple is superior on every level. They engage the child to learn and give them the desire to what to learn more. Catholic/Public schools do not even show a child how to properly hold a pencil. They foster bullies and do not inspire greatness. The Catholic/public teachers fall below average and the proof is in (for those who do not have experience first hand to compare) test scores. The administration is wonderful. I personally prefer a no nonsense professional business structure and policy for staff and parents. But some parents are whiny and need to be coddled and difficult to please. The school runs smoothly admin and edu and that is why Apple is so successful."

"I have two kids currently attending Apple Montessori in Wayne, NJ. My daughter started when she was 11 months and now in Pre-K. My son, on the other hand, enrolled when he was 18 months and now in nursery. I am truly grateful that I am able to send my kids to AMS. The staff is kind, caring and helpful. On the hand, I am amazed at my kids progress. They are independent, creative and confident in the work they do, thanks to AMS! The school also provides afterschool sports/activities that as a full-time working mom, I do not have to worry about drop-ups/drop-offs."

~ A parent

"Apple Montessori schools provide a superior education which affords parents a high degree of confidence that their children are receiving the foundational tools necessary for a lifetime of success. As parents, we are given the opportunity observe our children and quickly learn that the faculty is committed and the children are engaged. Yes, it is impressive that at such an early stage our children learned to read, write, complete math problems and score well on standardized tests. Most impressive, however, is Apple's clear desire to develop well-rounded, confident children. If you are fortunate enough to visit Apple and experience International Day, the Science Fair, the art exhibits, the musical performances and many of the other events they host, you will see first hand that Apple offers an appropriate balance of academics and personal development. As a parent, I am thankful that my children are able to be a part of the Apple Montessori tradition."

"Excellent School .My Kid went to the Ratzer Road Branch .She did her PK. Within a year she is able to read books and she has the love for reading which is very important i feel .Her teacher Mrs.Sanabria teaches them very well and all other staff are very caring .she enjoyed her art and craft activity too."

~ A parent

"My oldest child just graduated Kindergarten from AMS this year and his brother is a Pre-K. By engaging the children in hands on learning, an excellent reading program and the ability to work with their peers this program truly engages children in learning. The teachers connect with each child wherever they are in their learning, helping them succeed in a variety of ways building self confidence, practical skills and educational knowledge. My son's teacher was loving and strong giving the perfect balance for the classroom. With the help of the well trained assistants, I feel that the children are in excellent hands. \*\*\*I am so impressed that we will continue on to 1st grade in the fall!"

~ A parent

"I am impressed. I started my 5 year old at the kindergarten level, shortly after pulling him out off public school. In September, he could barely write and certainly not read. By March he tested at a 3rd grade reading and has great writing skills. He now reads chapter books, understands them and best of all loves reading, school and is very proud of himself. I will continue him in the 1st grade, seeing the tuition as an investment in his future!"

~ A parent

"I am a parent of a child who has been at Apple Montessori for 4 years and each year the school improves. What many comments here do not highlight is the specials program that the schools offer. The specials teachers are wonderful and very engaging. mr.Ashton in particular is very receptive to engaging parents about their children and that is great. Music, Art, computers and other programs exist but my child always looks forward to the gym program the school offers. All teachers are willing to meet with you to discuss your child and I find them to be very predictive."
